

From Research to Reality: Unlocking Potential for Innovation and Funding

*Prof Dr Giuseppe Strina (School of Economic Disciplines, University of Siegen) and
Timo Visestamkul (Entrepreneurship Center)*

When	Monday, 5 May 2025, 09:00-17:00 Tuesday, 6 May 2025, 09:00-17:00
Where	Haus der Innovation (F-IS) Sandstraße 26, 57072 Siegen
Organisers	House of Young Talents, Entrepreneurship Center
Language	English
Intended for	Doctoral and postdoctoral researchers
HYT-Certificate	Career module (16 AE)

This workshop aims to provide participants with the necessary skills and knowledge to identify the transfer potential of their research findings for practice by applying innovative methods and techniques to overcome the complexity in today's knowledge society. Participants will work in heterogeneous groups to gain a multidisciplinary perspective on their research projects. They will also be introduced to the fundamentals of innovation methods to transform their research findings into successful transfer projects. In this context, a market analysis will be conducted to evaluate the potential of their research and determine the competition. Furthermore, participants will learn to present their research projects to an expert jury and effectively communicate their results.

Doctoral candidates from Faculty III have the opportunity to acquire 5 credit points in accordance with the faculty's doctoral regulations. Credit points are awarded for active participation in the workshop (which includes pitching the research project to an expert jury) and writing an Executive Summary to lay the groundwork for future transfer potentials. Participants have the opportunity to write their Executive Summaries on Friday, 9 May, and Friday, 16 May 2025, in the HDI Co-Working Space (Sandstraße 26, 57072 Siegen), where coaches of the Entrepreneurship Center are available all day in order to answer questions and offer support. After submitting the Executive Summaries, participants receive an assessment of the transfer potential and recommendations for possible next steps with the Entrepreneurship Centre. Participants do not incur any costs for the acquisition of credit points. If you would like to acquire credit points, please indicate this in your registration.
